

SKIP COUNTING MONEY

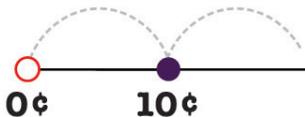

1. Complete the skip counting pattern below until you reach 100 cents (a dollar).

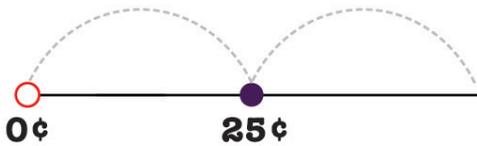

After, write the number of skip counts you needed.

Number of skip counts to reach a dollar:

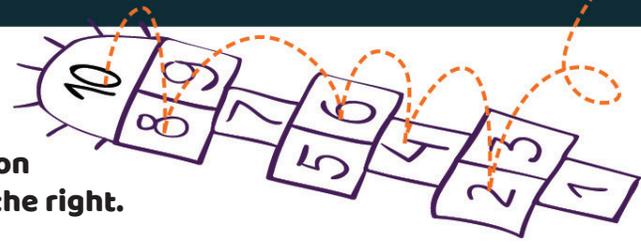

Number of skip counts to reach a dollar:

How many skip counts did it take?

COUNTING CHANGE

3. Tally up your pocket change by adding groups together to reach a total.

Example

			\$4
			\$1
			\$1
			10¢
			10¢
TOTAL			\$6 20¢

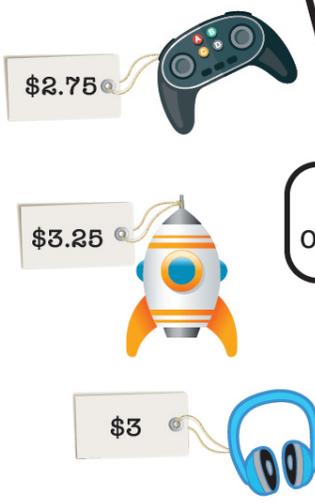

TOTAL	

DO I HAVE ENOUGH?

4. Complete the word problems below.

Olli has finally saved enough money to buy the toy he wants. Olli has 1 loonie, 6 quarters, 3 dimes and 5 nickels. Olli lost one nickel but now has the exact change required.

Circle the toy Olli wants to buy.

Blank area for showing work.

Show your work.

Naveen and Ashwin are putting their money together to buy a birthday present for Omar. Do they have enough to buy a gift and a balloon?

YES NO

Show your work.

DO I HAVE THE RIGHT CHANGE?

5. Fill in the price of the ice cream.
Count your change and write in the amount.
Then, confirm you have the right amount.

PRICE

MATCHING CHANGE COMBINATIONS

6. Draw a line to match the change on the left to the matching amount on the right. Use skip counting if it helps you.

MAKING CHANGE

7. Choose an ice cream and draw the change required to pay for it in two different ways. Then, ask two of your classmates which ice cream they would choose and write down its cost.

NAME	ICE CREAM AND COST	CHANGE #1	CHANGE #2
OMAR	 65¢		

BUILD A LUNCH

8. Choose one item from each category to create three different lunches. Calculate the full cost for each lunch- one for you, and for two friends.

Example

\$1 	25¢ 
\$2 	25¢ 

\$3

50¢

MENU

\$1 	\$3 
\$2 	\$2
